

BAUER

FOR A GREEN WORLD

Separator COMPACT

- Optimum cost-performance ratio
- Low operating costs
- Less space required
- Ideal for small farms with limited energy resources
- Wide range of Agricultural based applications
- Long life of wearing components

Separator COMPACT

BAUER

FOR A GREEN WORLD

Minimal total costs: energy efficient plus low initial investment

BAUER technology leads in the separation of liquid from solid nutrients.

Product Description

The new design Compact Press Screw Separator is a machine to separate solids and liquids with a rotating auger inside a full floating screen.

The medium is drained in the first part of the screen by gravitation. In the second step the medium is additionally extruded and exits the separator at the mouth piece.

The liquid phase can run out in an optimal way as the separator has a slight tangential deviation.

In order to control dry matter content an output regulator is installed on the separator.

Site Suitability

Low cost alternative to the existing BAUER S655 range. Where no separator is currently installed and the separation process will cut cost or add value.

Features and Benefits

- 3.0 kW motor
- Throughput up to 15 m³/h
- Dry matter content up to 28%

High Value Separator!

Technical Data

Throughput	up to 15 m ³ /h
Dry matter content	up to 28%
Input power	3.0 kW
Screen sizes	0.25 – 0.35 – 0.5 – 0.75 – 1.0 mm
